

# BUSINESS SURVIVAL ASSESSMENT SERVICE (BSAS)

Business continuity is essential for any organisation; a vital component of this is the ability to remain agile and adapt to changing threats and new working environments.

- Over **90%** of cloud breaches occur due to human error and misconfiguration
- Only **5%** of company networks are adequately protected
- Hackers strike every **29 seconds**

Security breaches can happen to any business, anywhere.

Business survival is paramount to ensuring the longevity and security of your business. Would your business survive an attack?

## Are you secure?

Our Business Survival Assessment Service (BSAS) service is designed to prepare you for the unexpected: evaluating your current level of readiness, guiding you to a solution that's both cost-effective and easy to deploy. Meaning you can implement your remote working plan with peace of mind, knowing your business, employees and supply chain remain fully protected with Australia's best.

It's never too late to make BSAS a part of your operations, and with our support, the process is simple.

To help our SMB and Enterprise clients tackle the continually changing environment, and adapt to current business needs, we have put together packages designed to ensure your business remains agile yet secure.

So you can rest assured knowing while you look after your staff, we'll look after your business security, ensuring the wrong people don't gain access to your infrastructure.

## Packages

**BSAS packages starting from \$1200\* , include 6 hours of consultation delivering:**

High-level review of your current technology stack

A report outlining recommended next steps

Certificate of completion 'Business Survival Assessment Service' review

### BSAS for Enterprise

- Custom packages available, made to scale for larger business needs

## Looking for more insight?

Get greater awareness into your current security positioning with our Vulnerability Assessment and Penetration Testing services.

- **Vulnerability Assessment:** a hands-on technical engagement providing a view of the known vulnerabilities that exist in your network. We identify, quantify, and prioritise vulnerabilities in your IT environment, then help you put a plan in place to mitigate and manage those risks.
- **Penetration Testing:** takes the next step, testing both known and unknown weaknesses in your environment, pushing things to discover if any vulnerabilities found could lead to a breach. These results help us establish a detailed set of recommendations on how to fix these issues to avoid a security incident.

## Where to from here?

Our Business Survival Assessment Service is just the start of your journey to security maturity.

We will review your current technology, identifying any gaps in your ability to keep operating during a crisis of any kind. Following initial findings, we can assist you with an ongoing, easily implemented plan.

Our range of services, in particular, our Electronic Chief Information Security Officer (eCISO) and Virtual Chief Information Security Officer (vCISO) services can oversee your security needs without the added burden and cost of additional employees.

Both our eCISO and vCISO services include staff training, quarterly reporting, remote ISMS consulting, regular vulnerability scanning and initial incident response - all required as part of annual board and compliance reporting.

## Need immediate help?

We're here for you. Our packages are designed to assist you with immediate response, working with you to determine the level of threat and actions required to protect your systems with additional hours and individual packages available to best suit your organisation's needs.

### Compliance

Red Piranha is ISO / IEC 27001:2013 certified. For Security Operations (SecOps) of our Crystal Eye (CE) Unified Threat Management (UTM) Appliance. GIC Cert No. 781489. Our Australian-based SOC 24/7 offering round the clock protection.

## Looking for extra security?

Our Crystal Eye units, combined with our Security Information and Event Management (SIEM) and Endpoint Detection and Response (EDR) packages, provide the most comprehensive security on the market starting from just \$15 per month.

- ▶ Multiple layers of protection
- ▶ 24/7 monitoring
- ▶ Lightning-fast incident response.
