

78% OF ORGANISATIONS HAVE A CYBERSECURITY SKILLS SHORTAGE*

Keeping an organisation secure is a full-time job, and it takes a team of qualified people.

► It's time to get the experts in.

SKILL UP WITHOUT THE HEADCOUNT

A CISO has to stay across so many different aspects of cybersecurity.

► It's time to share the load with a trusted team.

GET THE ASSURANCE YOU NEED

It's hard to do cybersecurity well, and it's hard to know if you're doing it right;

► It's time to get some independent assurance.

WHO CAN AFFORD A FULLTIME CISO ANYWAY?

CISOs are in high demand, making them hard to find and difficult to recruit.

Even a full-time CISO can benefit from our eCISO and vCISO services.

CISO Services

Red Piranha offers two types of CISO packages delivered through our ISO 27001 certified security operations centres tailored to meet your organisation's needs:

eCISO® – (electronic CISO)
automated CISO tasks with
remote consulting hours

vCISO – (virtual CISO)
on-site & remote security
specialists for CISO activities

Compliance

Businesses are under increasing pressure to meet a range of compliance requirements including ISO 27001, PCI and HIPAA. By establishing the right foundation with our CISO services, you can be better equipped to stay on top of your evolving compliance needs.

CISO Roles

BENEFITS

Establish your security foundation

—
Manage Board-level reporting

—
Ensure ongoing compliance

Red Piranha's cost-effective CISO services give you access to a pool of industry-leading security specialists, without the expensive overhead of a full-time CISO.

We're helping protect the world from cybersecurity threats by providing automated security solutions for every business; large and small.

SECURITY RESOURCING

Our electronic CISO service is an automated service that integrates directly with our Crystal Eye platform to deliver a range of cybersecurity tasks. It is complemented by remote consulting services to produce in-depth compliance reports and help Crystal Eye customers develop a detailed information security plan.

Our virtual CISO solution gives you on-site and remote access to our pool of highly-experienced security experts to develop your security plan and meet your reporting requirements. It can be utilised by customers using our Crystal Eye platform as well as those who aren't.

The frequency and scope of these deliverables can be adjusted and priced based on your required level of assurance.

Resource Utilisation

With an eCISO® or vCISO shouldering your security planning and reporting responsibilities, you and your team are free to focus on more strategic activities instead of putting out fires. Our CISO resources can recruit, train and mentor members of your IT and compliance teams to ensure proper security principles are being implemented and maintained across your organisation.

An eCISO® or vCISO can also help set security strategies, procure solutions, remediate incidents, and put foundations in place for your compliance needs. They may also assist with bring-your-own-device (BYOD) policy and enforcement as well as managing your board-level responsibilities.

Is your business compliant?

If you're not 100% sure of your compliance position, then you could benefit from eCISO® and vCISO services. There are laws in place that make directors personally liable if their organisation doesn't meet its compliance requirements, so you need to pay careful attention to ensure these obligations are met. Being compliant takes considerable effort to implement policies and continuously update your systems requiring a security expert with extensive IT security experience.

Do you have a security plan?

Without an active security plan that is regularly updated to address developing threats, you are putting yourself and your business at risk. Your security planning for people, process and technology must be relevant to your business and regularly updated.

PRICING

Pricing starts as follows and scales with number of seats. Tailored pricing is also available.

Service	Price
eCISO®	\$9,000 per annum
vCISO	\$30,000 per annum
